## Keep Your New Carron Bath In Pristine Condition Do's And Dont's

**DO:**

Use a Polypropylene pan scourer and bleach free cleaner (we recommend Cif) to rub away waterline deposits and grime. To retain that showroom sparkle we recommend you polish your bath on occasion.

**DO:**

Mop the bath dry, then apply T-Cut or Colour Cut generously and vigorously with a soft cloth folded into a pad. Include any chrome plated fittings such as bath grips, taps, shower equipment etc. T-Cut/Colour Cut are available from car garages.

**DO NOT** apply these substances to gold plated fittings.

**DO:**

Polish off the T-Cut with a large soft cloth.

**DO NOT** use abrasive cleaners or powders.

**DO NOT** use cleaners containing bleach.

**DO NOT** let the bath come into contact with nail polish remover or acetone.

**DO NOT** let the bath come into contact with paint stripper.
