

Haiku with C-Lenda System

9th November 2009

**Carron Bathrooms and C-Lenda
The Source of Whirlpool Excellence**

Carron Bathrooms are pleased to announce the launch of our exciting new whirlpool system. The components for this system are the most technologically advanced available in the market today and have been sourced from Markon based in New Zealand.

This unique, sleek jet technology makes the C-Lenda system stand out from the competition.

Markon's worldwide patented system combines the quality of today's modern materials with the look and feel of tomorrow's technology, offering the ultimate in both comfort and style. In previous whirlpools baths, the fittings protruded into the bathing area and were prone to build up of soap that was difficult to clean. In the unique C-Lenda design, all fittings are flush with the bath wall, creating a smooth, continuous surface. As well as the visual appeal this offers, the bathing experience is extremely comfortable and all fittings are easy to clean, maintaining the stunning look.

Almost all baths in Carron's extensive range are compatible with the C-Lenda system and are made to order by our skilled technicians at our factory in Falkirk, Scotland. We have created six basic system configurations to suit individual requirements. We will also consider any configuration suggestions a customer may have that we have not covered in our six options.
