Carron Inclusive Range Extended

Carron Bathrooms are delighted to announce the extension of their Inclusive range of baths. The hugely popular Axis and Matrix baths will now be available in 1500 and 1600 versions in addition to the 1700 versions already available, ensuring there is a design in this range to suit all bathroom sizes.

Also included in this range is the Aspect Showerbath. Designed specifically to meet the needs of customers who use their bath primarily for showering but for whom easy access is a priority.

The inclusive range is designed and manufactured at our base in Falkirk, Scotland and is available through our usual distribution network.
